Database Schema Installer / Updater

Your FOG database schema is not up to date, either because you have updated or this is a new FOG installation. If this is an upgrade, there will be a database backup stored on your FOG server defaulting under the folder /home/fogDBbackups. Should anything go wrong, this backup will enable you to return to the previous install if needed.
Are you sure you wish to install or update the FOG database?

INSTALL/UPGRADE NOW

If you would like to backup your FOG database you can do so using MySQL Administrator or by running the following command in a terminal window (Applications->System Tools->Terminal), this will save the backup in your home directory.

```
cd  
mysqldump --allow-keywords -x -v fog > fogbackup.sql
```

Bài tập Crackme 9

Em mở file và thấy chương trình yêu cầu nhập Serial Key

Giao diện có ô nhập, nút Check, và mục hướng dẫn bên dưới

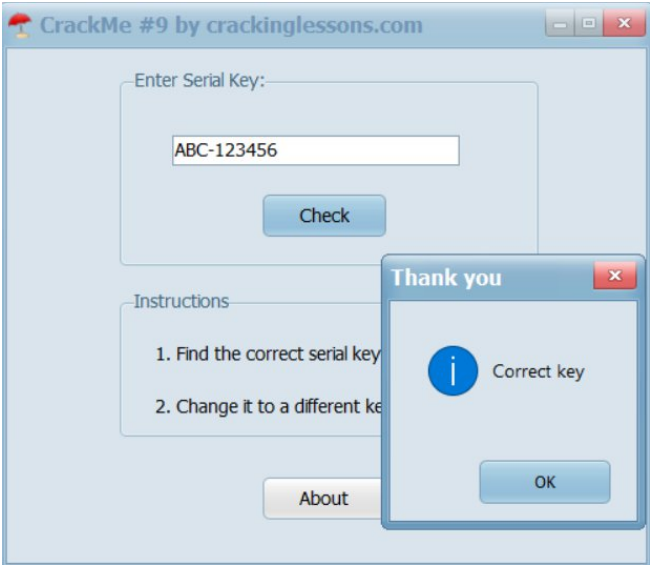

Nhiệm vụ của em là tìm ra serial key đúng, sau đó đổi nó thành một key khác theo ý mình

Em đưa file vào x32dbg và mở Strings References.
 Em thấy một chuỗi khá giống serial key: "ABC-123456" tại địa chỉ 0071822A.
 Chuỗi này nằm gần các thông báo "Sorry wrong key" và "Correct key", nên em nghi đây chính là serial đúng. Em đã thử nhập mã này vào ô Enter Serial Key.

mov edx,crackme9.718262	00718262	L"Correct key"
mov ecx,crackme9.71827A	0071827A	L"Thank you"

Serial em DONE!

Tiếp theo đến phần thay đổi giá trị này như bài trước em đã đổi giá trị của ô nhớ 0071822A thành trunganh123

Address	Hex	ASCII
0071822A	50 48 55 43	trunganh123456. So.
